## **Changing the Coil on a FunBikes 49cc Mini Quad**

This is a simple guide, intended for Funbikes Customers who have purchased the FunBikes 49cc Kids Mini Quad Bike, It contains instructional steps on how to change the coil, and includes images to aid you in the process.

# Changing the Coil on a FunBikes 49cc Mini Quad

This guide explains how to change the coil on a mini quad bike.

**What product does this guide apply to?**

- FunBikes 49cc Kids Mini Quad Bike
- FunBikes 49cc Big Wheel Mini Quad Bike

## Step 1

---

Remove the pull cord casing from the quad, by removing the three allen key bolts.

## Step 2

---

Remove the spark plug cap.

## Step 3

---

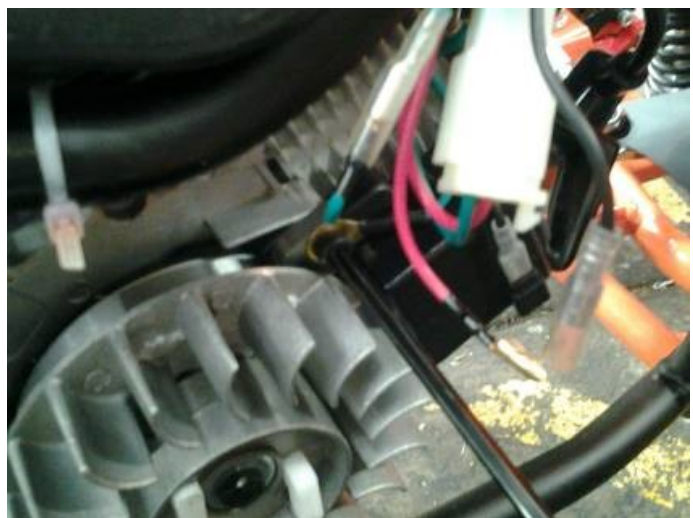

Disconnect the black/red bullet connector.

## Step 4

---

Undo the two bolts holding the coil in place and remove.

## Step 5

---

When you attach your new coil it needs to be as close to the fly wheel as possible without touching it. The smaller the gap to the flywheel the stronger the spark will be, this will help the quad start easier and burn the 2 stroke mix more efficiently.

## Step 6

---

Reverse the above steps.
